**KONSTRUK PSIKOLOGI KESABARAN DAN PERANNYA
DALAM KEBAHAGIAAN SESEORANG**

Oleh:
Subhan El Hafiz, Fahrul Rozi, Ilham Mundzir, Lila Pratiwi
Fakultas Psikologi, Universitas Muhammadiyah Prof. DR. HAMKA

ABSTRAK

Kesabaran merupakan konsep yang berakar dari konsep Islam (*Shabr*) oleh karena itu perumusan konstruk psikologi kesabaran harus mengacu pada sumber awalnya yaitu Al Quran dan Hadits. Penelitian ini dilakukan dengan banyak pendekatan, yaitu pendekatan kualitatif dan kuantitatif. Begitu juga dengan metode, dilakukan dengan banyak metode.

Studi 1 adalah pendefinisian psikologi kesabaran menggunakan pendekatan kualitatif dengan tafsir Quraish Shihab terhadap ayat dan hadits yang memiliki kata sabar. Berdasarkan tafsir tersebut peneliti mencari kata kunci dan membuat kategorisasi hingga analisa data. Hasilnya didapat definisi psikologi kesabaran.

Studi 2 yang dilakukan pada 86 orang mahasiswa F. Ilmu Kesehatan dan 140 mahasiswa F. Psikologi merupakan tahap pembuatan instrumen pengukuran sabar dengan dua metode, yaitu tes dan skala. Tes bertujuan untuk dapat membedakan kelompok sabar dan tidak serta tingkatannya sedangkan skala hanya melihat tingkatan kesabaran. Hasilnya kedua instrumen cukup baik dalam konsistensi internal Alpha Cronbach, yaitu 0,830 untuk skala dan 0,708. Selain itu tes juga mampu membedakan individu sabar dan tidak sabar.

Studi 3 merupakan lanjutan dari studi 2 untuk melihat hubungan kesabaran dengan variabel kebahagiaan. Variabel yang diuji adalah kepuasan hidup, kebahagiaan, dan optimisme. Kepuasan hidup diukur dengan Satisfaction with Life Scale (Diener, Emmons, Larsen, & Griffin, 1985), Kebahagiaan menggunakan 1 aitem skala (Khalek & Ahmed, 2006), dan optimisme menggunakan Revised-Life Orientation Test (Scheier, Carver dan Bridges, 1994) yang dianalisa menggunakan uji korelasi Spearman. Hasilnya untuk skala kesabaran didapatkan korelasi yang signifikan dengan kebahagiaan ($r=0,346$) dan optimisme ($r=0,350$) namun tidak dengan kepuasan hidup sedangkan untuk tes kesabaran didapatkan korelasi yang signifikan dengan kepuasan hidup ($r=0,256$) namun tidak dengan optimisme dan kebahagiaan.

Kata Kunci: Sabar, Psikologi Kesabaran, Skala Kesabaran, Tes Kesabaran, Kepuasan Hidup, Kebahagiaan, Optimisme.

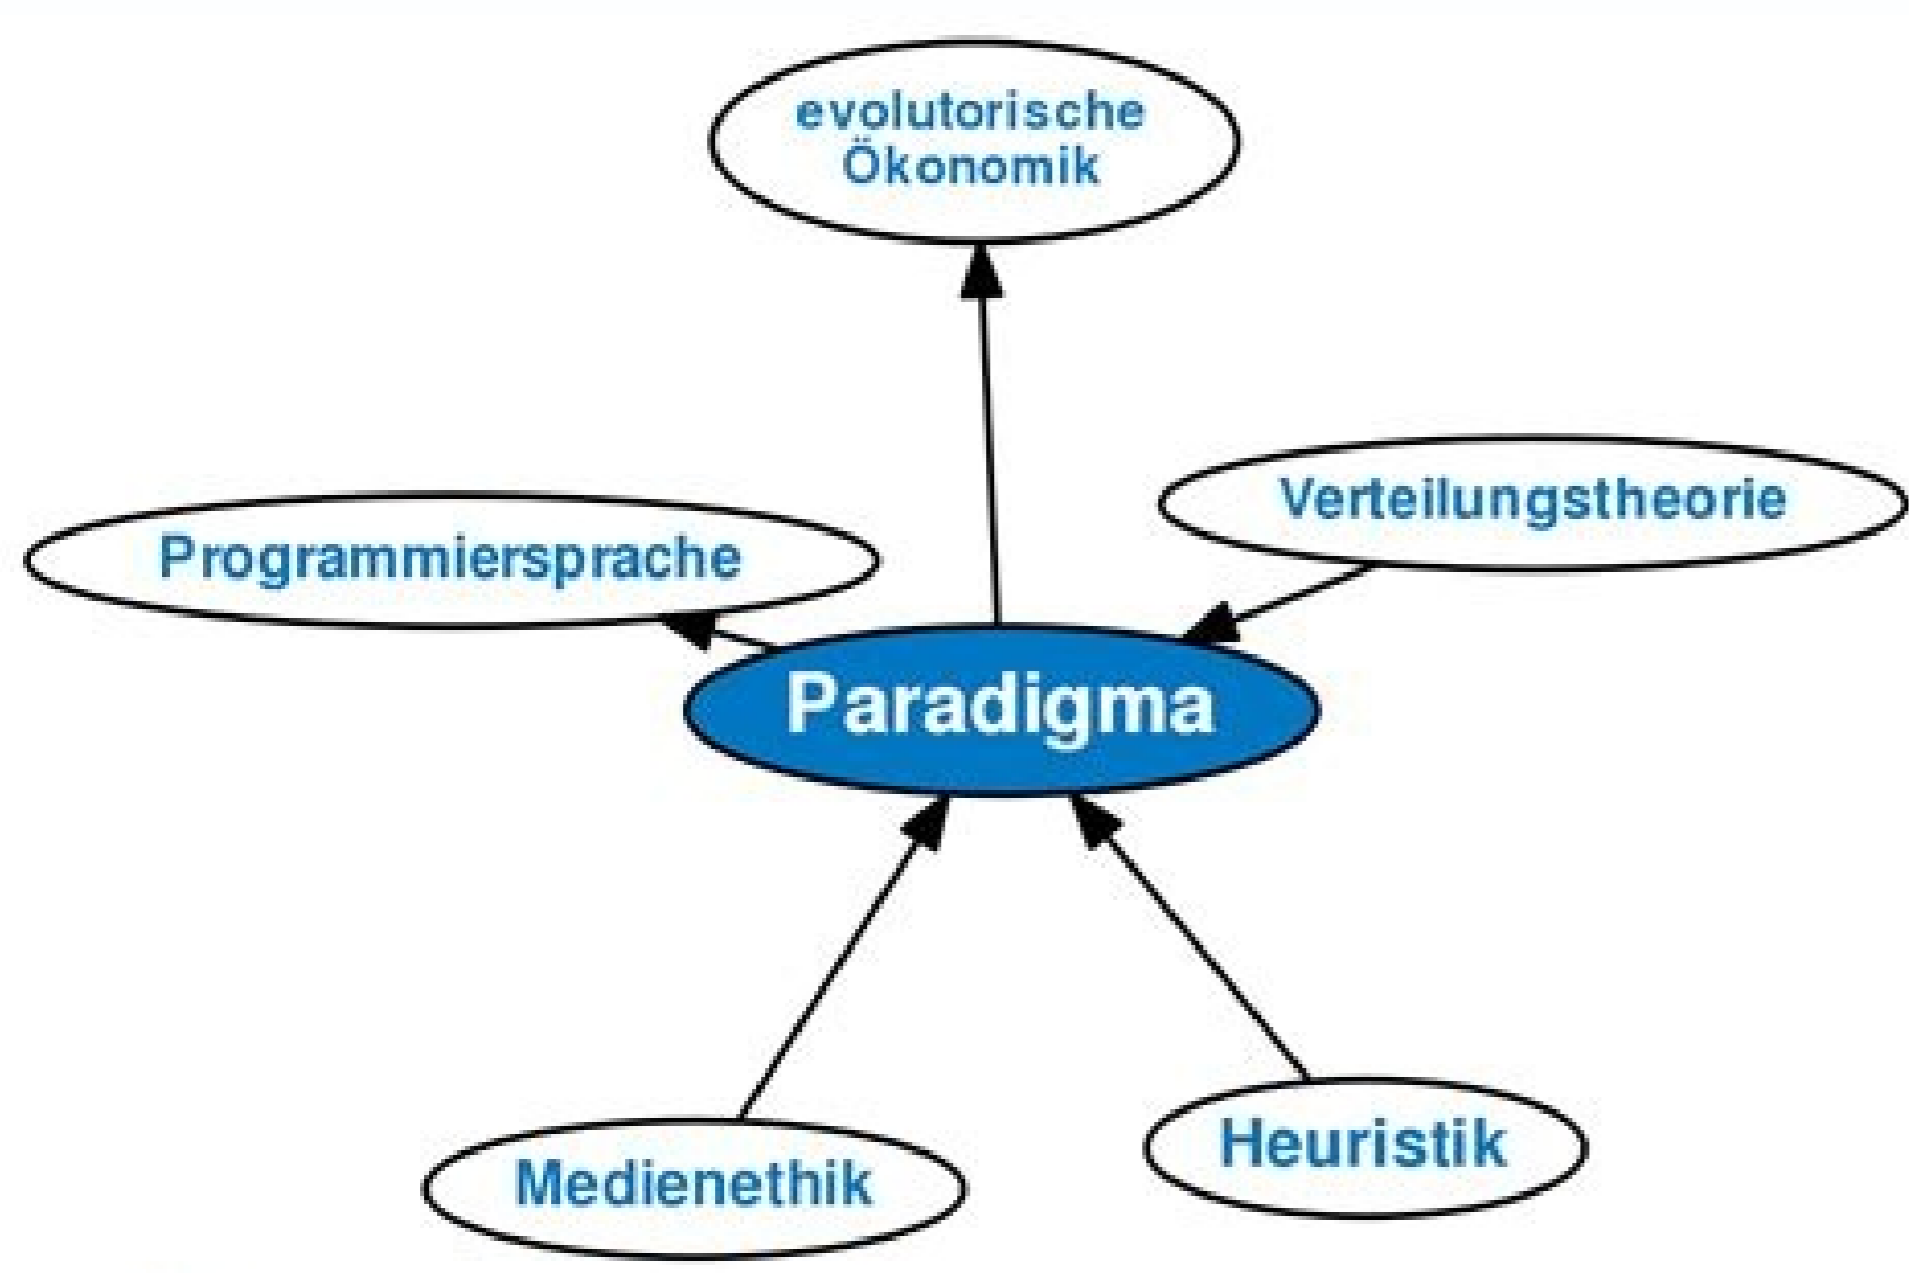

The Therapeutic Relationship

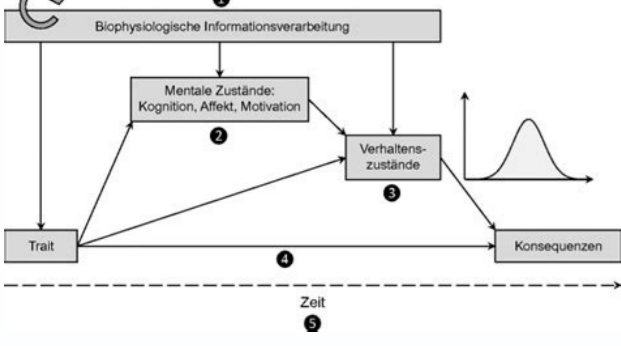

- One-person Relationship vs Two-person relationships
- Transference and Countertransference (Neutrality and the Blank Slate)
- Holding Environment
- Empathy
- Mirroring
- Relational Psychoanalysis and Intersubjectivity
- Personal Analysis
